

It is a family operated business of high moral standing. We provide good clean entertainment with equipment that is safe to use and does not involve any physical contact. Our service is laser tag which is like paintball, we use equipment that does not involve anything protruding from the barrel. Instead we use taggers that emit a signal that is similar to your remote for your television. This signal is read by sensors which are placed on the body and the tagger itself. By now you are probably thinking about indoor laser tag. Well that is what we are, but we do both from inside to outside. The mobility and flexibility means we can operate at just about any event. So whatever the event, whatever the age, Mobile Laser Forces is the company to call, just talk to us, and we'll do everything we can to create an unforgettable event.
